

Insertions 1 & 2 Produces Prion-Like Domain

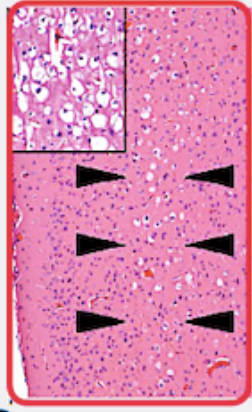

Yielding a Prion-like Domain Killing the humanized mice and Rhesus Macaques infected with it.
Producing Spongiform Encephalopathy and Lewy Bodies.

After two-weeks 95% of the humanized mice were dead and the two remaining were euthanized.

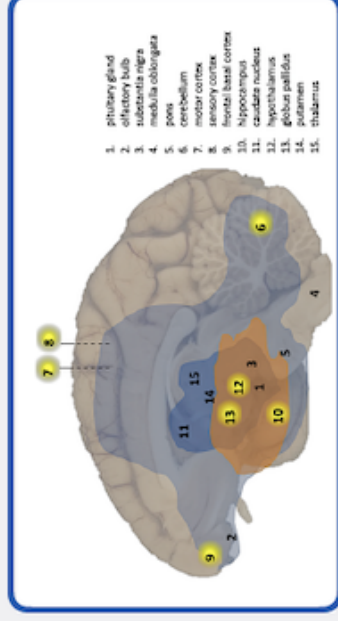

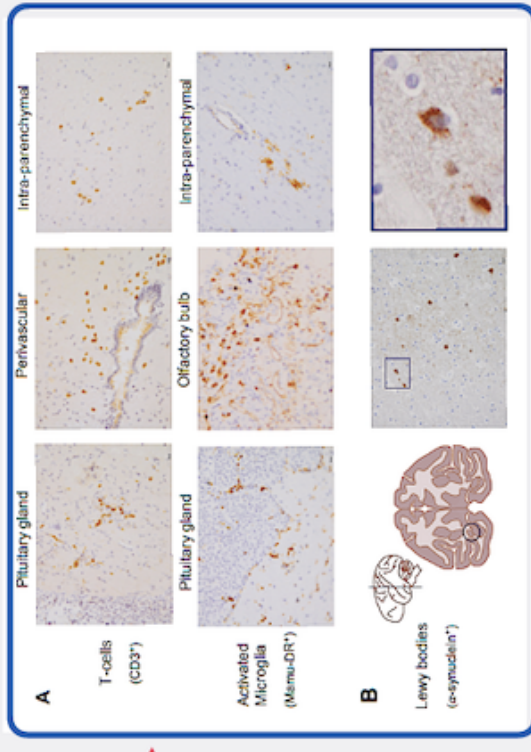

The Rhesus Macaques were euthanized after 5-6 weeks. Here is what was found.

1. HIV gp 120

Spongiosis (Mad Cow Disease) with nerve damage and death.

Inflammation & Lewy Bodies.
